The Australian Business Award for

BEST software PRODUCT

2013

Centium Software

Centium Software develops and supports software solutions servicing the accommodation industry, meeting and events industry, and landmark world events such as the Olympic and Commonwealth Games. The company has 25 years of hands-on experience developing and implementing software across diverse industries with experience in specifically designing, developing and supporting software for the hospitality, meetings and events industry.

GuestPoint is an easy to use property management system that streamlines every step from reservations to guest check-outs and simplifies web bookings. It is ideal for small and medium sized independent accommodation properties including hotels, motels, boutique inns, spas, resorts, back packers, hostels, mining camps and bed & breakfast accommodations. GuestPoint is supported by in-house 24/7 customer support via email or phone, a comprehensive list of short, topic specific training videos and step by step PDF guides.
